A designated "**Tree of Distinction**" is a mature specimen with a substantive diameter and height for its species. In cases where more than one specimen of a species fits this criteria, the one with the greatest diameter shall usually be designated.

A designated "**Tree of Interest**" is a specimen of a species not commonly found in the Burlington Urban Treescape. It may be a Carolinian species for which Burlington is the northern limit of its range or one from farther off which is not often planted here.

**Any designated tree must be in the front yard of a property or in a back yard position clearly visible and locatable from curbside
